JULY 8TH. DR. FRANK COLLIGE, CANDIDATE FOR
FLORIDA CHIEF FINANCIAL OFFICER

Dr. Frank W. Collige
Candidate for Florida Chief Financial Officer

My name is Dr. Frank W. Collige, and I am proud to announce my candidacy for Florida Chief Financial Officer. Florida deserves strong, experienced leadership that understands both the opportunities and the challenges facing our families, businesses, and taxpayers. I am running to bring accountability, transparency, and common-sense financial management back to Tallahassee.

Throughout my career, I have served my country, my community, and the private sector with dedication and integrity. From my service in the United States Air Force to leadership positions overseeing multi-million-dollar budgets, complex logistical operations, regulatory compliance, and organizational growth, I have spent decades solving problems, managing resources responsibly, and putting mission first.

Florida families are being squeezed by rising insurance costs, growing financial uncertainty, and concerns about government accountability. Too many people feel like the system works for insiders while everyday Floridians are left paying the price. That must change.

As your Chief Financial Officer, I will fight for three key priorities:

- Restoring transparency and accountability in state finances
- Stabilizing Florida's insurance market and protecting consumers
- Strengthening disaster preparedness and Florida's long-term financial resilience

I believe Florida can lead the nation with responsible fiscal policy, pro-growth economic leadership, and a government that respects taxpayers. We must ensure that families can afford to stay in their homes, small businesses can continue to grow, and every tax dollar is managed with honesty and efficiency.

This campaign is about protecting Florida's future, defending the interests of working families, and ensuring that our state remains strong, secure, and prosperous for generations to come.

Together, we can build a more resilient Florida and restore confidence in the financial leadership of our state.
